Journal of Organometallic Chemistry

Subject Index of Volume 576

Aldehyde
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
Alkene
Stereoselective alternating copolymerization of carbon monoxide with alkenes, 248
Alkenes
Palladium-catalyzed annulation, 111
Alkyl nitrite
Oxidative reactions by a palladium–alkyl nitrite system, 279
Alkynes
Heterocycles via cyclization of alkynes promoted by organopalladium complexes, 42
Palladium-catalyzed annulation, 111
Palladium-catalyzed enyne–yne [4 + 2] benzannulation as a new and general approach to polysubstituted benzenes, 232
Allenes
Palladium catalysed cascade cyclisation-anion capture. relay switches and molecular queues, 65
Allylation
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
π-Allyl complexes
Enantioselective palladium-catalyzed allylic substitutions with asymmetric chiral ligands, 203
Allylic amine
Palladium catalyzed enantioselective rearrangement of allylic imidates to allylic amides, 290
Allylic imidate
Palladium catalyzed enantioselective rearrangement of allylic imidates to allylic amides, 290
Allylic substitution
Catalytic asymmetric reactions via π-allylpalladium complexes coordinated with chiral monophosphine ligands, 195
π-Allylnickel
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
π-Allylpalladium
Catalytic asymmetric reactions via π-allylpalladium complexes coordinated with chiral monophosphine ligands, 195
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
Alternating copolymerization
Stereoselective alternating copolymerization of carbon monoxide with alkenes, 248
Anilines
Palladium-catalyzed amination of aryl halides and sulfonates, 125
Anion-capture
Palladium catalysed cascade cyclisation-anion capture. relay switches and molecular queues, 65
Annulation
Palladium-catalyzed annulation, 111
Aqueous media
Recent developments of palladium(0) catalyzed reactions in aqueous medium, 305
N-Aryl amines
Palladium-catalyzed amination of aryl halides and sulfonates, 125
Arylation
The palladium-catalysed arylation and vinylation of alkenes—enantioselective fashion, 1
Asymmetric
Stereoselective alternating copolymerization of carbon monoxide with alkenes, 248
Asymmetric catalysis
Enantioselective Heck reactions using chiral P,N-ligands, 16
Asymmetric synthesis
Enantioselective palladium-catalyzed allylic substitutions with asymmetric chiral ligands, 203

Benzene
Palladium-catalyzed enyne–yne [4 + 2] benzannulation as a new and general approach to polysubstituted benzenes, 232
Biologically active compounds
Palladium in action: domino coupling and allylic substitution reactions for the efficient construction of complex organic molecules, 88
Bis-silylations
Stereoselective bis-silylations and silylborations of carbon–carbon multiple bonds catalyzed by palladium(0) *t*-alkyl isocyanide complex, 300

Carbenes
Application of palladacycles in Heck type reactions, 23
Carbocycles
Palladium-catalyzed annulation, 111
Carbon monoxide
Stereoselective alternating copolymerization of carbon monoxide with alkenes, 248
Carbonylation
Palladium catalysed cascade cyclisation-anion capture. relay switches and molecular queues, 65
Carbopalladation
The palladium-catalysed arylation and vinylation of alkenes—enantioselective fashion, 1
Carbostannylation
The palladium–iminophosphine catalyst for the reactions of organostannanes, 169
Catalysis
Application of palladacycles in Heck type reactions, 23
Enantioselective palladium-catalyzed allylic substitutions with asymmetric chiral ligands, 203

PII: S0022-328X(99)00161-8

Heterocycles via cyclization of alkynes promoted by organopalladium complexes, 42
Palladium catalysed cascade cyclisation-anion capture, relay switches and molecular queues, 65
Palladium catalyzed enantioselective rearrangement of allylic imidates to allylic amides, 290
Catalytic asymmetric reactions
Catalytic asymmetric reactions via π-allylpalladium complexes coordinated with chiral monophosphine ligands, 195
Catalytic cycle
The palladium–iminophosphine catalyst for the reactions of organostannanes, 169
CC-coupling
Application of palladacycles in Heck type reactions, 23
Chiral monodendrate phosphine
Catalytic asymmetric reactions via π-allylpalladium complexes coordinated with chiral monophosphine ligands, 195
CN-coupling
Application of palladacycles in Heck type reactions, 23
Cross-coupling
Mechanistic and kinetic studies of palladium catalytic systems, 254
The palladium–iminophosphine catalyst for the reactions of organostannanes, 169
Cross-coupling reactions
Palladium in action: domino coupling and allylic substitution reactions for the efficient construction of complex organic molecules, 88
Recent advances in the cross-coupling reactions of organoboron derivatives with organic electrophiles, 1995–1998, 147
Cross coupling reactions
Recent developments of palladium(0) catalyzed reactions in aqueous medium, 305
Cyclic carbopalladation
Palladium catalysed cascade cyclisation-anion capture, relay switches and molecular queues, 65
Cyclization
Heterocycles via cyclization of alkynes promoted by organopalladium complexes, 42
Cycloaddition
Palladium-catalyzed enyne–yne [4 + 2] benzannulation as a new and general approach to polysubstituted benzenes, 232

Diene
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
Dienes
Palladium-catalyzed annulation, 111
Diethylzinc
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
Dimethyl carbonate
Oxidative reactions by a palladium–alkyl nitrite system, 279
Dimethyl oxalate
Oxidative reactions by a palladium–alkyl nitrite system, 279
Diynes
Palladium-catalyzed enyne–yne [4 + 2] benzannulation as a new and general approach to polysubstituted benzenes, 232
Domino reaction
Palladium in action: domino coupling and allylic substitution reactions for the efficient construction of complex organic molecules, 88

Enantioenriched
Palladium catalyzed enantioselective rearrangement of allylic imidates to allylic amides, 290
Enantioselective
Palladium catalyzed enantioselective rearrangement of allylic imidates to allylic amides, 290
The palladium-catalysed arylation and vinylation of alkenes—enantioselective fashion, 1
Enynes
Palladium-catalyzed enyne–yne [4 + 2] benzannulation as a new and general approach to polysubstituted benzenes, 232

α-Halo-α,β-unsaturated carbonyl compounds
Novel and selective α-substitution of ketones and other carbonyl compounds based on Pd-catalyzed cross coupling of α,β-unsaturated carbonyl derivatives containing α-halogen or α-metal groups, 179
Heck reaction
Application of palladacycles in Heck type reactions, 23
Mechanistic and kinetic studies of palladium catalytic systems, 254
Palladium in action: domino coupling and allylic substitution reactions for the efficient construction of complex organic molecules, 88
The palladium-catalysed arylation and vinylation of alkenes—enantioselective fashion, 1
Heterocycles
Heterocycles via cyclization of alkynes promoted by organopalladium complexes, 42
Palladium-catalyzed annulation, 111
Heterocyclic synthesis
Palladium catalysed cascade cyclisation-anion capture, relay switches and molecular queues, 65
Homoallylation
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
Homocoupling
The palladium–iminophosphine catalyst for the reactions of organostannanes, 169

Ketone
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215

Mechanism
Mechanistic and kinetic studies of palladium catalytic systems, 254
α-Metallo-α,β-unsaturated carbonyl compounds
Novel and selective α-substitution of ketones and other carbonyl compounds based on Pd-catalyzed cross coupling of α,β-unsaturated carbonyl derivatives containing α-halogen or α-metal groups, 179
Multi-component reaction
Palladium in action: domino coupling and allylic substitution reactions for the efficient construction of complex organic molecules, 88

Nickel
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215

Olefin oxidation
Oxidative reactions by a palladium–alkyl nitrite system, 279
Optically active allylsilanes
Stereoselective bis-silylations and silylborations of carbon–carbon multiple bonds catalyzed by palladium(0) *t*-alkyl isocyanide complex, 300
Organoboron compounds
Recent advances in the cross-coupling reactions of organoboron derivatives with organic electrophiles, 1995–1998, 147
Oxazolines
Enantioselective Heck reactions using chiral P,N-ligands, 16
Oxidative addition
Mechanistic and kinetic studies of palladium catalytic systems, 254
The palladium–iminophosphine catalyst for the reactions of organostannanes, 169

Palladacycles
Application of palladacycles in Heck type reactions, 23
Palladium
Application of palladacycles in Heck type reactions, 23
Enantioselective Heck reactions using chiral P,N-ligands, 16
Enantioselective palladium-catalyzed allylic substitutions with asymmetric chiral ligands, 203
Heterocycles via cyclization of alkynes promoted by organopalladium complexes, 42
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215
Oxidative reactions by a palladium–alkyl nitrite system, 279
Palladium catalysed cascade cyclisation-anion capture. relay switches and molecular queues, 65
Palladium catalyzed enantioselective rearrangement of allylic imidates to allylic amides, 290
Palladium-catalyzed enyne–yne [4 + 2] benzannulation as a new and general approach to polysubstituted benzenes, 232
Recent developments of palladium(0) catalyzed reactions in aqueous medium, 305
Stereoselective alternating copolymerization of carbon monoxide with alkenes, 248
Palladium catalysis
Palladium-catalyzed annulation, 111
Palladium catalyst
Mechanistic and kinetic studies of palladium catalytic systems, 254
Palladium catalysts
Palladium-catalyzed amination of aryl halides and sulfonates, 125
Recent advances in the cross-coupling reactions of organoboron derivatives with organic electrophiles, 1995–1998, 147
Palladium *t*-alkyl isocyanide complex
Stereoselective bis-silylations and silylborations of carbon–carbon multiple bonds catalyzed by palladium(0) *t*-alkyl isocyanide complex, 300
Pd-catalyzed cross coupling
Novel and selective α-substitution of ketones and other carbonyl compounds based on Pd-catalyzed cross coupling of α,β-unsaturated carbonyl derivatives containing α-halogen or α-metal groups, 179
Phosphine ligands
Palladium-catalyzed amination of aryl halides and sulfonates, 125
Phosphines
Application of palladacycles in Heck type reactions, 23
Enantioselective palladium-catalyzed allylic substitutions with asymmetric chiral ligands, 203
P,N-ligands
Enantioselective Heck reactions using chiral P,N-ligands, 16
Polycyclisation
Palladium catalysed cascade cyclisation-anion capture. relay switches and molecular queues, 65

Recycling
Recent developments of palladium(0) catalyzed reactions in aqueous medium, 305
Reduction
Catalytic asymmetric reactions via π-allylpalladium complexes coordinated with chiral monophosphine ligands, 195

[3,3]-Sigmatropic rearrangement
Palladium catalyzed enantioselective rearrangement of allylic imidates to allylic amides, 290
Silylborations
Stereoselective bis-silylations and silylborations of carbon–carbon multiple bonds catalyzed by palladium(0) *t*-alkyl isocyanide complex, 300
Stereoselective
Stereoselective alternating copolymerization of carbon monoxide with alkenes, 248
α-Substitution of carbonyl compounds
Novel and selective α-substitution of ketones and other carbonyl compounds based on Pd-catalyzed cross coupling of α,β-unsaturated carbonyl derivatives containing α-halogen or α-metal groups, 179
Suzuki coupling
Recent advances in the cross-coupling reactions of organoboron derivatives with organic electrophiles, 1995–1998, 147

Triethylborane
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215

Umpolung
Novel catalytic reactions involving π-allylpalladium and -nickel as the key intermediates: umpolung and β-decarbopalladation of π-allylpalladium and nickel-catalyzed homoallylation of carbonyl compounds with 1,3-dienes, 215

Vinylation
The palladium-catalysed arylation and vinylation of alkenes—enantioselective fashion, 1
